

Project LCCA (SC2) – CI with Jenkins & MsBuild.

Things to note:-

1. MsTest & CodeCoverage cannot be configured as test projects are not in shape to be included in the build.
2. PI (Partition Inspector) tool cannot be configured as it works against target database and NOT the DB scripts.
 - a. This can be achieved if we are able to deploy the database through CI. The DB deployment is a time consuming activity.
3. We need to do some changes in the Project files and get them checked-in into TFS to ensure smooth running of the CI tool. The changes required to run the tools are done locally on the machine.
4. The StyleCop & FxCop report is aligned with the agreed standard/rules with LCCA.
5. FxCop report includes all the relevant DLLs to be analyzed.
6. StyleCop currently includes only 1 project from the solution as in Jenkins there is no option/plugin to report StyleCop violation from multiple project within solution.
 - a. As a solution to this, a console app can be written to merge the violation in 1 and provide that as a source to Jenkins to display the trend.
7. Below are the reports which can be derived from CI.

Jenkin's Dashboard: - Trend chart of Code Metrics, FxCop & StyleCop.

Detail information of the code metrics analysis

Code Metrics Report

Code Metrics Summary

| Name | MaintainabilityIndex (diff) | CyclomaticComplexity (diff) | ClassCoupling (diff) | DepthOfInheritance (diff) | LinesOfCode (diff) |
|-------------|-----------------------------|-----------------------------|----------------------|---------------------------|--------------------|
| All Classes | 71 | 127292 | 5522 | 36 | 318497 |

Code Metrics by Module

| Name | MaintainabilityIndex (diff) | CyclomaticComplexity (diff) | ClassCoupling (diff) | DepthOfInheritance (diff) | LinesOfCode (diff) |
|---|-----------------------------|-----------------------------|----------------------|---------------------------|--------------------|
| LCCA.Clinical.RestServiceEntity.dll | 93 | 413 | 14 | 2 | 413 |
| LCCA.Clinical.Security.dll | 65 | 225 | 53 | 1 | 467 |
| LCCA.Clinical.UI.dll | 71 | 20993 | 1675 | 6 | 57256 |
| LCCA.Clinical.Data.dll | 59 | 21562 | 912 | 4 | 82804 |

Metric Report continues....

Code Metrics by Module

| Name | MaintainabilityIndex (diff) | CyclomaticComplexity (diff) | ClassCoupling (diff) | DepthOfInheritance (diff) | LinesOfCode (diff) |
|---|-----------------------------|-----------------------------|----------------------|---------------------------|--------------------|
| LCCA.Clinical.RestServiceEntity.dll | 93 | 413 | 14 | 2 | 413 |
| LCCA.Clinical.Security.dll | 65 | 225 | 53 | 1 | 467 |
| LCCA.Clinical.UI.dll | 71 | 20993 | 1675 | 6 | 57256 |
| LCCA.Clinical.Data.dll | 59 | 21562 | 912 | 4 | 82804 |
| LCCA.Clinical.RestServiceProxies.dll | 88 | 1383 | 188 | 3 | 2204 |

| IsCurrentShift.get() : bool | 98 | 1 | 0 | 1 |

Violation Reports:- All the static code analysis will be shown here as violation

FxCop next level detail

NOTE: Rule which is violating can be seen by hovering on the tooltip as shown below.

File: ProgressNotes.cs Lines 782 to 812

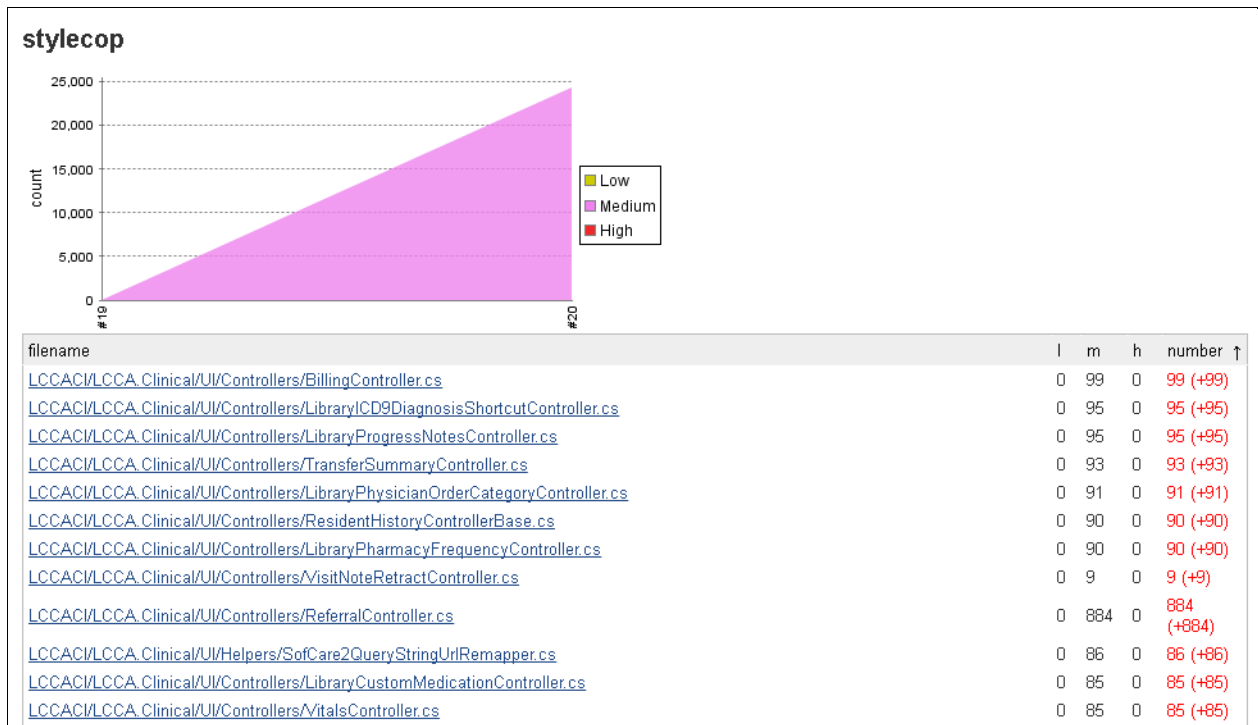

```
782     }
783
784     /// <summary>
785     /// Gets or sets the details of all Addendum's created for a progress note of a resident.
786     /// </summary>
787     /// <value>The Addendum.</value>
788     [Audit]
789     public Collection<ProgressNoteAddendum> Addendum
790     {
791         get { return this._addendum; }
```

Type Class Description

| | | |
|-------|--------------|--|
| fxcop | Usage#CA2227 | Properties that return collections should be read-only so that users cannot entirely replace the backing store. Users can still modify the contents of the collection by calling relevant methods on the collection. Note that the XmlSerializer class has special support for deserializing read-only collections. See the XmlSerializer overview for more information. |
|-------|--------------|--|

```
799     [Audit]
800     public List<ProgressNotes> ProgressNotesTimeList
801     {
802         get { return this._progressNotesTimeList; }
803         set { this._progressNotesTimeList = value; }
804     }
805
806     /// <summary>
```

Style Cop Violation

NOTE: Similar to FxCop report you will be taken to code where hovering on warning icon would display the rule violated.

File: BillingController.cs Lines 30 to 102

```
30
31    /// <summary>
32    /// Billing Controller
33    /// </summary>
34    public class BillingController : ClinicalController
35    {
36        /// <summary>
37        /// Billing Manager
38        /// </summary>
39        private readonly IBillingManager _billingManager;
40
41        /// <summary>
42        /// Resident Manager
43        /// </summary>
44        private readonly IAdmissionManager _admissionManager;
45
46        /// <summary>
47        /// Resident Manager
48        /// </summary>
49        private readonly IResidentManager _residentManager;
50
```

| Type | Class | Description |
|----------|-------------|---|
| stylecop | NamingRules | Field names must not start with an underscore. (SA1309) |
